Scheduling feedback:

Mike:

Using Github and Trello together made it very easy to plan our work and keep everyone accountable for what they were working on. If I had questions or ideas for changes to any part of our system I knew who to ask.

Kelly:

Everyone in the group had good participation and we all stayed involved throughout the entire process of the project. The frequent use of Trello and Github by all group members allowed everyone to stay updated about the progress of the website.

Grant:

Our communication was great! Everyone seemed to know what to do and the priority of the task. The group was well organized.

Lindsey:

This was the first time I used Trello. It was very easy to use, and it helped out greatly with our group communication. It was very straightforward about what everyone was working on, what was completed and by who, and also what needed to still be finished. Trello worked very well for us for this project, and I would definitely use this tool again in the future.
